S&P STARS - Since January 1, 1987, Standard & Poor's Equity Research Services has ranked a universe of common stocks based on a given stock's potential for future performance. Under proprietary STARS (STock Appreciation Ranking System), S&P equity analysts rank stocks according to their individual forecast of a stock's future total return potential versus the expected total return of a relevant benchmark (e.g., a regional index (S&P Asia 50 Index, S&P Europe 350 Index or S&P 500 Index)), based on a 12-month time horizon. STARS was designed to meet the needs of investors looking to put their investment decisions in perspective.

S&P Issuer Credit Rating - A Standard & Poor's Issuer Credit Rating is a current opinion of an obligor's overall financial capacity (its creditworthiness) to pay its financial obligations. This opinion focuses on the obligor's capacity and willingness to meet its financial commitments as they come due. It does not apply to any specific financial obligation, as it does not take into account the nature of and provisions of the obligation, its standing in bankruptcy or liquidation, statutory preferences, or the legality and enforceability of the obligation. In addition, it does not take into account the creditworthiness of the guarantors, insurers, or other forms of credit enhancement on the obligation. The Issuer Credit Rating is not a recommendation to purchase, sell, or hold a financial obligation issued by an obligor, as it does not comment on market price or suitability for a particular investor. Issuer Credit Ratings are based on current information furnished by obligors or obtained by Standard & Poor's from other sources it considers reliable. Standard & Poor's does not perform an audit in connection with any Issuer Credit Rating and may, on occasion, rely on unaudited financial information. Issuer Credit Ratings may be changed, suspended, or withdrawn as a result of changes in, or unavailability of, such information, or based on other circumstances.

S&P 12 Month Target Price - The S&P equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics.

Standard & Poor's or an affiliate may license certain intellectual property or provide pricing or other services to, or otherwise have a financial interest in, certain issuers of securities, including exchange-traded investments whose investment objective is to substantially replicate the returns of a proprietary Standard & Poor's index, such as the S&P 500. In cases where Standard & Poor's or an affiliate is paid fees that are tied to the amount of assets that are invested in the fund or the volume of trading activity in the fund, investment in the fund will generally result in Standard & Poor's or an affiliate earning compensation in addition to the subscription fees or other compensation for services rendered by Standard & Poor's. A reference to a particular investment or security by Standard & Poor's and/or one of its affiliates is not a recommendation to buy, sell, or hold such investment or security, nor is it considered to be investment advice.

Standard & Poor's and its affiliates provide a wide range of services to, or relating to, many organizations, including issuers of securities, investment advisers, broker-dealers, investment banks, other financial institutions and financial intermediaries, and accordingly may receive fees or other economic benefits from those organizations, including organizations whose securities or services they may recommend, rate, include in model portfolios, evaluate or otherwise address.
