

Unitel EDI

Technical requirements as to the EDI security and transport modules

Equipment

Java compatible platform

- CD-ROM drive for installation of Nordea software
- Free harddisk space (the program takes up about 50MB)
- Java Runtime Environment, version 1.4.2
- Internet connection: See below.

Platform

- PC (NT, 2000 and XP)
- Unix (AIX and SUN SOLARIS)
- AS/400 (OS/400, version 5.3 or later).

Internet connection

Line

- Subscription at internet service provider (ISP), such as ordinary telephone line, ISDN or ADSL
- Configuration as *Network via modem* or *Internet via LAN*.

Firewall

- Open for secure Telnet traffic on port 60060
- Open for HTTPS traffic on port 443
- Possible restriction to Nordea's IP address 62.13.0.7.

Data security

User data security, data encryption keys and host login

- User data, data encryption keys and host login are stored in encrypted database files, which are created when the EDI security and transport modules are installed.
